RESPONSE TO RESTRICTION/ELECTION REQUIREMENT

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Restriction/Election Requirement dated August 17, 2005,
Applicants provisionally elect with traverse Group I, Embodiment 3, and identify Claims 1-4,
6, 9-11, 14, 17-19, 22, and 23 as readable on the elected species.

At the outset, it appears that the outstanding Office Action has not applied the unity of
invention standard of restriction practice as set forth in 37 C.F.R. § 1.499. The present
application is a PCT application. Accordingly, the unity of invention standard applies.

Therefore, as set forth in MPEP § 1893.03(d):

the examiner must (1) list the different groups of claims and (2)
explain why each group lacks unity with each other group (i.e., why there
is no single general inventive concept) specifically describing the unique
special technical feature in each group.

In this case, the outstanding Office Action does not satisfy either requirement set forth in
MPEP § 1893.03(d).

Moreover,

A group of inventions is considered linked to form a single general inventive concept where there is a technical relationship among the inventions that involves at least one common or corresponding special technical feature.

Applicants respectfully submit that, under the unity of invention standard, the outstanding Restriction/Election requirement is improper. Accordingly, it is respectfully requested that the requirement to elect a single species be withdrawn pursuant to 37 C.F.R. §1.143, and that a full examination on the merits of Claims 1-31 be conducted.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
